-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 2-11 and 13-35 have been considered but are moot in view of the new ground(s) of rejection.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 2-11, 13-29 and 33-35 are drawn to a tool for inserting and/or removing a service connection valve core, classified in class 137, subclass 315.41.
- II. Claims 30-32 are drawn to a tool and pneumatic gun for applying or removing a valve means, classified in class 29, subclass 221.6.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I and Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are distinct in that they are not capable of being used together because they have different modes of operations and different effects. Note that the invention of Group I does not recite or require the claimed pneumatic gun as set forth in Group II. These groups are further distinct for the following reasons:

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was not made to the applicants or their attorney(s) to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

The applicant's attention is directed to the following patents with discussion with the examiner upon receipt of this action in an attempt to place this application in condition for allowance. Schuessler, Jr. et al (5,803,108), Olson (3,840,967), Fritch (3,561,090), Morton (3,208,133), Rivers (6,612,05 B2), Spalink et al (Re. 34,781), Jensen (5,139,049), Stickley (5,228,178), Barjesteh et al (6,525,436), Campbell (5,241,380) and Karcher (4,182,370).
